

A hand-drawn wireframe sketch of a user interface for searching LEGO sets. At the top, there is a navigation bar with four tabs: "Sets" (underlined), "minifigs", "Pieces", and "About". Below the navigation bar is a section labeled "filters". Under "filters", there are two boxes: one for "theme" containing checkboxes for "Star wars", "Harry Potter", "City", and others, and another for "User groups" containing checkboxes for "Owned" and "Want", with a colon at the bottom.

The main search area features a "Search" input field, a "Sort By:" dropdown menu with "Descending" selected, and a table listing LEGO sets. The table has columns for "SET#", "Name", "Theme", "Parts", "Minifigs", and "Year". One row is shown in detail: "76391", "Hogwarts Icons", "Harry Potter", "3010", "3", and "2021". Below the table, there are several horizontal wavy lines and a vertical ellipsis.
